Redland

The Redland Training and Resource Centre has been training the roofing industry since 1983. A wide range of people have visited our purpose-built facility and enjoyed both practical and theoretical learning, in a safe and comfortable environment.

Now running at over 30,000 delegates in the first 25 years, we look forward to training future groups of delegates, on both our traditional and exciting new range of products.

This leaflet highlights a selection of our most popular courses. Please contact us for further details on these or other courses available at the Training and Resource Centre.

Institute of Roofing

10 day course over 10 weeks + exam

This course is a mixture of both practical and technical sessions in the conference room and workshop. After the exam, and depending upon experience, Licentiate or Associate membership will be achieved.

Membership of the IoR carries professional status when applying for your CSCS card for access to construction sites.

Charge Applies

Bespoke Training Days

If you have 6 or more people that would benefit from specific product training, then we can put together a training day around your needs. It could be entirely practical and product based, or around current regulations and technical changes. It is a fabulous way of getting a team to work together.

Please contact us to discuss further details.
